PROFESSIONAL SUMMARY

Informatics Engineering student at Universitas Tarumanagara seeking an IT internship. Experienced in building full-stack web applications with JavaScript, React, Node.js, and MongoDB through personal and collaborative projects. Strong in problem solving, logical and analytical thinking, teamwork, and communication. Has been taking Mandarin lessons for some time and is currently preparing for HSK 2. Aims to build a career in technology and artificial intelligence (AI).

WORK EXPERIENCE

Member, Security Division September – October 2026
Open House FTI 2026
- Played the NPC role during the Open House FTI 2026 event.
- Helped keep the participant registration flow running smoothly.
- Coordinated with fellow division members to carry out assigned duties.

Participant September – October 2026
Skillwallet Smartbridge MongoDB Program
- Completed an intensive training program on managing and implementing MongoDB-based databases.
- Designed the data architecture and built a functional capstone project applying the training material.

Inventory Intern April – June 2023
PT Monstermart Indonesia
- Monitored and maintained product stock across branches by checking product availability and quantities.
- Prepared and replenished products according to each branch's requirements.
- Coordinated with team members to keep stock available and accurate.

EDUCATION

Bachelor's Program in Informatics Engineering 2024 – 2028 (Semester 5)
Universitas Tarumanagara | GPA: 3.75/4.00

PROJECTS

BakeHouse October 2026
Project Creator | GitHub
- Built a full-stack MERN bakery e-commerce and order management system featuring role-based authentication, a shopping cart, and an admin dashboard.
- Technologies: Node.js, Express, Mongoose, MongoDB Atlas, Midtrans (sandbox), React, Vite, React Router, Tailwind CSS.

Belajar Mandarin October 28 – 30, 2026
Project Creator | GitHub
- Built a web app for learning Mandarin vocabulary through flashcards, multiple-choice quizzes, and a Leitner spaced-repetition system.
- Designed a panda-themed Indonesian-language interface with Web Speech API pronunciation playback, all learning progress is stored in localStorage with no backend.
- Technologies: React, Vite, Tailwind CSS, localStorage, Web Speech API.

Dapute May 2025
Contributor / Developer | GitHub
- Developed the shopping cart, checkout, order detail, and homepage features of an e-commerce app for an SME cookie brand, in a 5-student team using Agile Scrum and GitHub collaboration.
- Technologies: PHP, Laravel, Livewire, Alpine.js, Tailwind CSS, Vite, Supabase (PostgreSQL).

SKILLS

- **Programming & Web:** Python, JavaScript, PHP, Laravel, React, Next.js, Node.js
- **Databases:** MongoDB, MySQL, Supabase
- **Tools:** GitHub, Jira, Microsoft Teams, Canva
- **Soft Skills:** Problem Solving, Logical Thinking, Analytical Skills, Teamwork, Communication, Adaptability
- **Languages:** Mandarin
